furnishing of telecommunications and all services rendered in connection therewith for a consideration, other than between a parent corporation and its wholly owned subsidiaries or between wholly owned subsidiaries, when the gross charge made by one such corporation to another such corporation is not greater than the gross charge paid to the retailer for their use or consumption and not for sale.

(g) "Service address" means the location of telecommunications equipment from which telecommunications services are originated or at which telecommunications services are received. If this is not a defined location, as in the case of wireless telecommunications, paging systems, maritime systems, service address means the customer's place of primary use as defined in the Mobile Telecommunications Sourcing Conformity Act. For air-to-ground systems, and the like, "service address" shall mean the location of the customer's primary use of the telecommunications equipment as defined by the location in Illinois where bills are sent.

Section 15. The Simplified Municipal Telecommunications Tax Act is amended by changing Section 5-7 as follows:

(35 ILCS 636/5-7)
Sec. 5-7. Definitions. For purposes of the taxes authorized by this Act:
"Amount paid" means the amount charged to the taxpayer's service address in such municipality regardless of where such amount is billed or paid.
"Department" means the Illinois Department of Revenue.
"Gross charge" means the amount paid for the act or privilege of originating or receiving telecommunications in such municipality and for all services and equipment provided in connection therewith by a retailer, valued in money whether paid in money or otherwise, including cash, credits, services and property of every kind or nature, and shall be determined without any deduction on account of the cost of such telecommunications, the cost of the materials used, labor or service costs or any other expense whatsoever. In case credit is extended, the amount thereof shall be included only as and when paid. "Gross charges" for private line service shall include charges imposed at each channel point within this State, charges for the channel mileage between each channel point within this State, and charges for that portion of the interstate inter-office channel provided within Illinois.
Charges for that portion of the interstate inter-office channel provided in Illinois shall be determined by the retailer as follows: (i) for interstate inter-office channels having 2 channel termination points, only one of which is in Illinois, 50% of the total charge imposed; (ii) for interstate inter-office channels having more than 2 channel termination points, one or more of which are in Illinois, an amount equal to the total charge multiplied by a fraction, the numerator of which is the number of channel termination points within Illinois and the denominator of which is the total number of channel termination points; or (iii) any other method that reasonably apportions the total charges for interstate inter-office channels among the states in which channel termination points are located. Prior to June 1, 2003, any apportionment method consistent with this paragraph shall be accepted as a reasonable method to determine the charges for that portion of the interstate inter-office channel provided in Illinois.

provided within Illinois for that period. However, "gross charge" shall not include any of the following:

(1) Any amounts added to a purchaser's bill because of a charge made pursuant to: (i) the tax imposed by this Act, (ii) the tax imposed by the Telecommunications Excise Tax Act, (iii) the tax imposed by Section 4251 of the Internal Revenue Code, (iv) 911 surcharges, or (v) charges added to customers' bills pursuant to the provisions of Section 9-221 or 9-222 of the Public Utilities Act, as amended, or any similar charges added to customers' bills by retailers who are not subject to rate regulation by the Illinois Commerce Commission for the purpose of recovering any of the tax liabilities or other amounts specified in those provisions of the Public Utilities Act.

(2) Charges for a sent collect telecommunication received outside of such municipality.

(3) Charges for leased time on equipment or charges for the storage of data or information for subsequent retrieval or the processing of data or information intended to change its form or content. Such equipment includes, but is not limited to, the use of calculators, computers, data processing equipment, tabulating equipment or accounting equipment and also includes the usage of computers under a time-sharing agreement.

(4) Charges for customer equipment, including such equipment that is leased or rented by the customer from any source, wherein such charges are disaggregated and separately identified from other charges.

(5) Charges to business enterprises certified as exempt under Section 9-222.1 of the Public Utilities Act to the extent of such exemption and during the period of time specified by the Department of Commerce and Community Affairs.

(6) Charges for telecommunications and all services and equipment provided in connection therewith between a parent corporation and its wholly owned subsidiaries or between wholly owned subsidiaries when the tax imposed under this Act has already been paid to a retailer and only to the extent that the charges between the parent corporation and wholly owned subsidiaries or between wholly owned subsidiaries represent expense allocation between the corporations and not the generation of profit for the corporation rendering such service.

(7) Bad debts ("bad debt" means any portion of a debt that is related to a sale at retail for which gross charges are not otherwise deductible or excludable that has become worthless or uncollectible, as determined under applicable federal income tax standards; if the portion of the debt deemed to be bad is subsequently paid, the retailer shall report and pay the tax on that portion during the reporting period in which the payment is made).

(8) Charges paid by inserting coins in coin-operated telecommunication devices.

(9) Amounts paid by telecommunications retailers under the Telecommunications Infrastructure Maintenance Fee Act.

New matter indicated by italics - deletions by strikeout.
(10) **Charges for nontaxable services or telecommunications** if (i) those charges are aggregated with other charges for telecommunications that are taxable, (ii) those charges are not separately stated on the customer bill or invoice, and (iii) the retailer can reasonably identify the nontaxable charges on the retailer’s books and records kept in the regular course of business. If the nontaxable charges cannot reasonably be identified, the gross charge from the sale of both taxable and nontaxable services or telecommunications billed on a combined basis shall be attributed to the taxable services or telecommunications. The burden of proving nontaxable charges shall be on the retailer of the telecommunications.

"Interstate telecommunications" means all telecommunications that either originate or terminate outside this State.

"Intrastate telecommunications" means all telecommunications that originate and terminate within this State.

"Person" means any natural individual, firm, trust, estate, partnership, association, joint stock company, joint venture, corporation, limited liability company, or a receiver, trustee, guardian, or other representative appointed by order of any court, the Federal and State governments, including State universities created by statute, or any city, town, county, or other political subdivision of this State.

"Purchase at retail" means the acquisition, consumption or use of telecommunications through a sale at retail.

"Retailer" means and includes every person engaged in the business of making sales at retail as defined in this Section. The Department may, in its discretion, upon application, authorize the collection of the tax hereby imposed by any retailer not maintaining a place of business within this State, who, to the satisfaction of the Department, furnishes adequate security to insure collection and payment of the tax. Such retailer shall be issued, without charge, a permit to collect such tax. When so authorized, it shall be the duty of such retailer to collect the tax upon all of the gross charges for telecommunications in this State in the same manner and subject to the same requirements as a retailer maintaining a place of business within this State. The permit may be revoked by the Department at its discretion.

"Retailer maintaining a place of business in this State", or any like term, means and includes any retailer having or maintaining within this State, directly or by a subsidiary, an office, distribution facilities, transmission facilities, sales office, warehouse or other place of business, or any agent or other representative operating within this State under the authority of the retailer or its subsidiary, irrespective of whether such place of business or agent or other representative is located here permanently or temporarily, or whether such retailer or subsidiary is licensed to do business in this State.

"Sale at retail" means the transmitting, supplying or furnishing of telecommunications and all services and equipment provided in connection therewith for a consideration, to persons other than the Federal and State governments, and State universities created by statute and other than between a parent corporation and its wholly owned subsidiaries or between wholly owned subsidiaries for their use or consumption and not for resale.

"Service address" means the location of telecommunications equipment from which

telecommunications services are originated or at which telecommunications services are received by a taxpayer. In the event this may not be a defined location, as in the case of mobile phones, paging systems, and maritime systems, service address means the customer's place of primary use as defined in the Mobile Telecommunications Sourcing Conformity Act. For air-to-ground systems and the like, "service address" shall mean the location of a taxpayer's primary use of the telecommunications equipment as defined by telephone number, authorization code, or location in Illinois where bills are sent.

"Taxpayer" means a person who individually or through his or her agents, employees, or permittees engages in the act or privilege of originating or receiving telecommunications in a municipality and who incurs a tax liability as authorized by this Act.

"Telecommunications", in addition to the meaning ordinarily and popularly ascribed to it, includes, without limitation, messages or information transmitted through use of local, toll, and wide area telephone service, private line services, channel services, telegraph services, teletypewriter, computer exchange services, cellular mobile telecommunications service, specialized mobile radio, stationary two-way radio, paging service, or any other form of mobile and portable one-way or two-way communications, or any other transmission of messages or information by electronic or similar means, between or among points by wire, cable, fiber optics, laser, microwave, radio, satellite, or similar facilities. As used in this Act, "private line" means a dedicated non-traffic sensitive service for a single customer, that entitles the customer to exclusive or priority use of a communications channel or group of channels, from one or more specified locations to one or more other specified locations. The definition of "telecommunications" shall not include value added services in which computer processing applications are used to act on the form, content, code, and protocol of the information for purposes other than transmission. "Telecommunications" shall not include purchases of telecommunications by a telecommunications service provider for use as a component part of the service provided by such provider to the ultimate retail consumer who originates or terminates the taxable end-to-end communications. Carrier access charges, right of access charges, charges for use of inter-company facilities, and all telecommunications resold in the subsequent provision of, used as a component of, or integrated into, end-to-end telecommunications service shall be non-taxable as sales for resale. Prepaid telephone calling arrangements shall not be considered "telecommunications" subject to the tax imposed under this Act. For purposes of this Section, "prepaid telephone calling arrangements" means that term as defined in Section 2-27 of the Retailers' Occupation Occupations Tax Act.

Sec. 15. Double-barrelled bonds. Whenever revenue bonds have been authorized to

be issued pursuant to applicable law or whenever there exists for a governmental unit a revenue source, the procedures set forth in this Section may be used by a governing body. General obligation bonds may be issued in lieu of such revenue bonds as authorized, and general obligation bonds may be issued payable from any revenue source. Such general obligation bonds may be referred to as "alternate bonds". Alternate bonds may be issued without any referendum or backdoor referendum except as provided in this Section, upon the terms provided in Section 10 of this Act without reference to other provisions of law, but only upon the conditions provided in this Section. Alternate bonds shall not be regarded as or included in any computation of indebtedness for the purpose of any statutory provision or limitation except as expressly provided in this Section.

Such conditions are:

(a) Alternate bonds shall be issued for a lawful corporate purpose. If issued in lieu of revenue bonds, alternate bonds shall be issued for the purposes for which such revenue bonds shall have been authorized. If issued payable from a revenue source in the manner hereinafter provided, which revenue source is limited in its purposes or applications, then the alternate bonds shall be issued only for such limited purposes or applications. Alternate bonds may be issued payable from either enterprise revenues or revenue sources, or both.

(b) Alternate bonds shall be subject to backdoor referendum. The provisions of Section 5 of this Act shall apply to such backdoor referendum, together with the provisions hereof. The authorizing ordinance shall be published in a newspaper of general circulation in the governmental unit. Along with or as part of the authorizing ordinance, there shall be published a notice of (1) the specific number of voters required to sign a petition requesting that the issuance of the alternate bonds be submitted to referendum, (2) the time when such petition must be filed, (3) the date of the prospective referendum, and (4), with respect to authorizing ordinances adopted on or after January 1, 1991, a statement that identifies any revenue source that will be used to pay debt service the principal of and interest on the alternate bonds. The clerk or secretary of the governmental unit shall make a petition form available to anyone requesting one. If no petition is filed with the clerk or secretary within 30 days of publication of the authorizing ordinance and notice, the alternate bonds shall be authorized to be issued. But if within this 30 days period, a petition is filed with such clerk or secretary signed by electors numbering the greater of (i) 7.5% of the registered voters in the governmental unit or (ii) 200 of those registered voters or 15% of those registered voters, whichever is less, asking that the issuance of such alternate bonds be submitted to referendum, the clerk or secretary shall certify such question for submission at an election held in accordance with the general election law. The question on the ballot shall include a statement of any revenue source that will be used to pay debt service the principal of and interest on the alternate bonds. The alternate bonds shall be authorized to be issued if a majority of the votes cast on the question at such election are in favor thereof provided that notice of the bond referendum, if held before July 1, 1999, has been given in accordance with the provisions of Section 12-5 of the Election Code in effect at the time of the bond referendum, at least 10 and not more than 45 days before the date of the election, notwithstanding the time for publication otherwise imposed by Section 12-5.

required in connection with the submission of public questions on or after July 1, 1999 shall
be as set forth in Section 12-5 of the Election Code. Backdoor referendum proceedings for
bonds and alternate bonds to be issued in lieu of such bonds may be conducted at the same
time.

(c) To the extent payable from enterprise revenues, such revenues shall have been
determined by the governing body to be sufficient to provide for or pay in each year to final
maturity of such alternate bonds all of the following: (1) costs of operation and maintenance
of the utility or enterprise, but not including depreciation, (2) debt service on all outstanding
revenue bonds payable from such enterprise revenues, (3) all amounts required to meet any
fund or account requirements with respect to such outstanding revenue bonds, (4) other
contractual or tort liability obligations, if any, payable from such enterprise revenues, and (5)
in each year, an amount not less than 1.25 times debt service of all (i) alternate bonds payable
from such enterprise revenues previously issued and outstanding and (ii) alternate bonds
proposed to be issued. To the extent payable from one or more revenue sources, such sources
shall have been determined by the governing body to provide in each year, an amount not
less than 1.25 times debt service of all alternate bonds payable from such revenue sources
previously issued and outstanding and alternate bonds proposed to be issued. The 1.25 figure
in the preceding sentence shall be reduced to 1.10 if the revenue source is a governmental
revenue source. The conditions enumerated in this subsection (c) need not be met for that
amount of debt service provided for by the setting aside of proceeds of bonds or other
moneys at the time of the delivery of such bonds.

(c-1) In the case of alternate bonds issued as variable rate bonds (including refunding
bonds), debt service shall be projected based on the rate for the most recent date shown in
the 20 G.O. Bond Index of average municipal bond yields as published in the most recent
dition of The Bond Buyer published in New York, New York (or any successor publication
or index, or if such publication or index is no longer published, then any index of long-term
municipal tax-exempt bond yields selected by the governmental unit), as of the date of
determination referred to in subsection (c) of this Section. Any interest or fees that may be
payable to the provider of a letter of credit, line of credit, surety bond, bond insurance,
or other credit enhancement relating to such alternate bonds and any fees that may be payable
to any remarketing agent need not be taken into account for purposes of such projection. If
the governmental unit enters into an agreement in connection with such alternate bonds at
the time of issuance thereof pursuant to which the governmental unit agrees for a specified
period of time to pay an amount calculated at an agreed-upon rate or index based on a
notional amount and the other party agrees to pay the governmental unit an amount
calculated at an agreed-upon rate or index based on such notional amount, interest shall be
projected for such specified period of time on the basis of the agreed-upon rate payable by
the governmental unit.

(d) The determination of the sufficiency of enterprise revenues or a revenue source,
as applicable, shall be supported by reference to the most recent audit of the governmental
unit, which shall be for a fiscal year ending not earlier than 18 months previous to the time
of issuance of the alternate bonds. If such audit does not adequately show such enterprise

New matter indicated by italics - deletions by strikeout.
revenues or revenue source, as applicable, or if such enterprise revenues or revenue source, as applicable, are shown to be insufficient, then the determination of sufficiency shall be supported by the report of an independent accountant or feasibility analyst, the latter having a national reputation for expertise in such matters, demonstrating the sufficiency of such revenues and explaining, if appropriate, by what means the revenues will be greater than as shown in the audit. Whenever such sufficiency is demonstrated by reference to a schedule of higher rates or charges for enterprise revenues or a higher tax imposition for a revenue source, such higher rates, charges or taxes shall have been properly imposed by an ordinance adopted prior to the time of delivery of alternate bonds. The reference to and acceptance of an audit or report, as the case may be, and the determination of the governing body as to sufficiency of enterprise revenues or a revenue source shall be conclusive evidence that the conditions of this Section have been met and that the alternate bonds are valid.

(e) The enterprise revenues or revenue source, as applicable, shall be in fact pledged to the payment of the alternate bonds; and the governing body shall covenant, to the extent it is empowered to do so, to provide for, collect and apply such enterprise revenues or revenue source, as applicable, to the payment of the alternate bonds and the provision of not less than an additional .25 (or .10 for governmental revenue sources) times debt service. The pledge and establishment of rates or charges for enterprise revenues, or the imposition of taxes in a given rate or amount, as provided in this Section for alternate bonds, shall constitute a continuing obligation of the governmental unit with respect to such establishment or imposition and a continuing appropriation of the amounts received. All covenants relating to alternate bonds and the conditions and obligations imposed by this Section are enforceable by any bondholder of alternate bonds affected, any taxpayer of the governmental unit, and the People of the State of Illinois acting through the Attorney General or any designee, and in the event that any such action results in an order finding that the governmental unit has not properly set rates or charges or imposed taxes to the extent it is empowered to do so or collected and applied enterprise revenues or any revenue source, as applicable, as required by this Act, the plaintiff in any such action shall be awarded reasonable attorney’s fees. The intent is that such enterprise revenues or revenue source, as applicable, shall be sufficient and shall be applied to the payment of debt service on such alternate bonds so that taxes need not be levied, or if levied need not be extended, for such payment. Nothing in this Section shall inhibit or restrict the authority of a governing body to determine the lien priority of any bonds, including alternate bonds, which may be issued with respect to any enterprise revenues or revenue source.

In the event that alternate bonds shall have been issued and taxes, other than a designated revenue source, shall have been extended pursuant to the general obligation, full faith and credit promise supporting such alternate bonds, then the amount of such alternate bonds then outstanding shall be included in the computation of indebtedness of the governmental unit for purposes of all statutory provisions or limitations until such time as an audit of the governmental unit shall show that the alternate bonds have been paid from the enterprise revenues or revenue source, as applicable, pledged thereto for a complete fiscal year.

New matter indicated by italics - deletions by strikeout.
Alternate bonds may be issued to refund or advance refund alternate bonds without meeting any of the conditions set forth in this Section, except that the term of the refunding bonds shall not be longer than the term of the refunded bonds and that the debt service payable in any year on the refunding bonds shall not exceed the debt service payable in such year on the refunded bonds.

Once issued, alternate bonds shall be and forever remain until paid or defeased the general obligation of the governmental unit, for the payment of which its full faith and credit are pledged, and shall be payable from the levy of taxes as is provided in this Act for general obligation bonds.

The changes made by this amendatory Act of 1990 do not affect the validity of bonds authorized before September 1, 1990.

Sec. 16.5. Proposition for bonds. For all elections held after July 1, 2000, the form of a proposition to authorize the issuance of bonds pursuant to either a referendum or backdoor referendum may be as set forth in this Section as an alternative to the form of proposition as otherwise set forth by applicable law. The proposition authorized by this Section shall be in substantially the following form:

Shall (name of governmental unit) (state purpose for the bond issue) and issue its bonds to the amount of $ (state amount) for the purpose of paying the costs thereof?

If a school district expects to receive a school construction grant from the State of Illinois has received a grant entitlement from the Illinois State Board of Education pursuant to the School Construction Law for a school construction project to be financed in part with proceeds of a bond authorized by referendum, then the form of proposition may at the option of the school district additionally contain substantially the following language:

(Name of school district) expects to receive a school construction grant from the State of Illinois has received a grant entitlement in the amount of $ (state amount) from the Illinois State Board of Education pursuant to the School Construction Law for the school construction project to be financed in part with proceeds of the bonds, based on (i) a grant entitlement from the State Board of Education and (ii) current recognized project costs determined by the Capital Development Board.

Sec. 17. Leases and installment contracts.

(a) Interest not debt; debt on leases and installment contracts. Interest on bonds shall not be included in any computation of indebtedness of a governmental unit for the purpose of any statutory provision or limitation. For bonds consisting of leases and installment or financing contracts, (1) that portion of payments made by a governmental unit under the terms of a bond designated as interest in the bond or the ordinance authorizing such bond shall be treated as interest for purposes of this Section (2) where portions of payments due

under the terms of a bond have not been designated as interest in the bond or the ordinance authorizing such bond, and all or a portion of such payments is to be used for the payment of principal of and interest on other bonds of the governmental unit or bonds issued by another unit of local government, such as a public building commission, the payments equal to interest due on such corresponding bonds shall be treated as interest for purposes of this Section and (3) where portions of payments due under the terms of a bond have not been designated as interest in the bond or ordinance authorizing such bond and no portion of any such payment is to be used for the payment of principal of and interest on other bonds of the governmental unit or another unit of local government, a portion of each payment due under the terms of such bond shall be treated as interest for purposes of this Section; such portion shall be equal in amount to the interest that would have been paid on a notional obligation of the governmental unit (bearing interest at the highest rate permitted by law for bonds of the governmental unit at the time the bond was issued or, if no such limit existed, 12%) on which the payments of principal and interest were due at the same times and in the same amounts as payments are due under the terms of the bonds. The rule set forth in this Section shall be applicable to all interest no matter when earned or accrued or at what interval paid, and whether or not a bond bears interest which compounds at certain intervals. For purposes of bonds sold at amounts less than 95% of their stated value at maturity, interest for purposes of this Section includes the difference between the amount set forth on the face of the bond as the original principal amount and the bond's stated value at maturity.

This subsection may be made applicable to bonds issued prior to the effective date of this Act by passage of an ordinance to such effect by the governing body of a governmental unit.

(b) Purchase or lease of property. The governing body of each governmental unit may purchase or lease either real or personal property, including investments, investment agreements, or investment services, through agreements that provide that the consideration for the purchase or lease may be paid through installments made at stated intervals for a period of no more than 20 years or another period of time authorized by law, whichever is greater; provided, however, that investments, investment agreements, or investment services purchased in connection with a bond issue may be paid through installments made at stated intervals for a period of time not in excess of the maximum term of such bond issue. Each governmental unit may issue certificates evidencing the indebtedness incurred under the lease or agreement. The governing body may provide for the treasurer, comptroller, finance officer, or other officer of the governing body charged with financial administration to act as counter-party to any such lease or agreement, as nominee lessor or seller. When the lease or agreement is executed by the officer of the governmental unit authorized by the governing body to bind the governmental unit thereon by the execution thereof and is filed with and executed by the nominee lessor or seller, the lease or agreement shall be sufficiently executed so as to permit the governmental unit to issue certificates evidencing the indebtedness incurred under the lease or agreement. The certificates shall be valid whether or not an appropriation with respect thereto is included in any annual or supplemental budget adopted by the governmental unit. From time to time, as the governing body executes contracts for

New matter indicated by italics - deletions by strikeout.
Section 5. The State Finance Act is amended by changing Sections 13.2 and 25 as follows:

(30 ILCS 105/13.2) (from Ch. 127, par. 149.2)
Sec. 13.2. Transfers among line item appropriations.
(a) Transfers among line item appropriations from the same treasury fund for the objects specified in this Section may be made in the manner provided in this Section when the balance remaining in one or more such line item appropriations is insufficient for the purpose for which the appropriation was made.

No transfers may be made from one agency to another agency, nor may transfers be made from one institution of higher education to another institution of higher education. Transfers may be made only among the objects of expenditure enumerated in this Section, except that no funds may be transferred from any appropriation for personal services, from any appropriation for State contributions to the State Employees' Retirement System, from any separate appropriation for employee retirement contributions paid by the employer, nor from any appropriation for State contribution for employee group insurance. Further, if an agency receives a separate appropriation for employee retirement contributions paid by the employer, any transfer by that agency into an appropriation for personal services must be accompanied by a corresponding transfer into the appropriation for employee retirement contributions paid by the employer, in an amount sufficient to meet the employer share of the employee contributions required to be remitted to the retirement system.

(b) In addition to the general transfer authority provided under subsection (c), the following agencies have the specific transfer authority granted in this subsection:

The Illinois Department of Public Aid is authorized to make transfers representing savings attributable to not increasing grants due to the births of additional children from line items for payments of cash grants to line items for payments for employment and social services for the purposes outlined in subsection (f) of Section 4-2 of the Illinois Public Aid Code.

The Department of Children and Family Services is authorized to make transfers not exceeding 2% of the aggregate amount appropriated to it within the same treasury fund for the following line items among these same line items: Foster Home and Specialized Foster Care and Prevention, Institutions and Group Homes and Prevention, and Purchase of Adoption and Guardianship Services.

The Department on Aging is authorized to make transfers not exceeding 2% of the aggregate amount appropriated to it within the same treasury fund for the following Community Care Program line items among these same line items: Homemaker and Senior Companion Services, Case Coordination Units, and Adult Day Care Services.

The State Treasurer is authorized to make transfers among line item appropriations from the Capital Litigation Trust Fund, with respect to costs incurred in fiscal years 2002 and 2003 only, when the balance remaining in one or more such line item appropriations is insufficient for the purpose for which the appropriation was made, provided that no such transfer may be made unless the amount transferred is no longer required for the purpose for which that appropriation was made.

New matter indicated by italics - deletions by strikeout.
(c) The sum of such transfers for an agency in a fiscal year shall not exceed 2% of the aggregate amount appropriated to it within the same treasury fund for the following objects: Personal Services; Extra Help; Student and Inmate Compensation; State Contributions to Retirement Systems; State Contributions to Social Security; State Contribution for Employee Group Insurance; Contractual Services; Travel; Commodities; Printing; Equipment; Electronic Data Processing; Operation of Automotive Equipment; Telecommunications Services; Travel and Allowance for Committed, Paroled and Discharged Prisoners; Library Books; Federal Matching Grants for Student Loans; Refunds; Workers' Compensation, Occupational Disease, and Tort Claims; and, in appropriations to institutions of higher education, Awards and Grants. Notwithstanding the above, any amounts appropriated for payment of workers' compensation claims to an agency to which the authority to evaluate, administer and pay such claims has been delegated by the Department of Central Management Services may be transferred to any other expenditure object where such amounts exceed the amount necessary for the payment of such claims.

(c-1) Special provisions for State fiscal year 2003. Notwithstanding any other provision of this Section to the contrary, for State fiscal year 2003 only, transfers among line item appropriations to an agency from the same treasury fund may be made provided that the sum of such transfers for an agency in State fiscal year 2003 shall not exceed 3% of the aggregate amount appropriated to that State agency for State fiscal year 2003 for the following objects: personal services, except that no transfer may be approved which reduces the aggregate appropriations for personal services within an agency; extra help; student and inmate compensation; State contributions to retirement systems; State contributions to social security; State contributions for employee group insurance; contractual services; travel; commodities; printing; equipment; electronic data processing; operation of automotive equipment; telecommunications services; travel and allowance for committed, paroled, and discharged prisoners; library books; federal matching grants for student loans; refunds; workers' compensation, occupational disease, and tort claims; and, in appropriations to institutions of higher education, awards and grants.

(d) Transfers among appropriations made to agencies of the Legislative and Judicial departments and to the constitutionally elected officers in the Executive branch require the approval of the officer authorized in Section 10 of this Act to approve and certify vouchers. Transfers among appropriations made to the University of Illinois, Southern Illinois University, Chicago State University, Eastern Illinois University, Governors State University, Illinois State University, Northeastern Illinois University, Northern Illinois University, Western Illinois University, the Illinois Mathematics and Science Academy and the Board of Higher Education require the approval of the Board of Higher Education and the Governor. Transfers among appropriations to all other agencies require the approval of the Governor.

The officer responsible for approval shall certify that the transfer is necessary to carry out the programs and purposes for which the appropriations were made by the General Assembly and shall transmit to the State Comptroller a certified copy of the approval which shall set forth the specific amounts transferred so that the Comptroller may change his
records accordingly. The Comptroller shall furnish the Governor with information copies of all transfers approved for agencies of the Legislative and Judicial departments and transfers approved by the constitutionally elected officials of the Executive branch other than the Governor, showing the amounts transferred and indicating the dates such changes were entered on the Comptroller's records.

(d) The Department of Public Health and the Department of Human Services (acting as successor to the Department of Public Health under the Department of Human Services Act) shall each annually submit to the State Comptroller, Senate President, Senate Minority Leader, Speaker of the House, House Minority Leader, and the respective Chairmen and Minority Spokesmen of the Appropriations Committees of the Senate and the House, on or before December 31, a report of fiscal year funds used to pay for services provided in any prior fiscal year. This report shall document by program or service category those expenditures from the most recently completed fiscal year used to pay for services provided in prior fiscal years.

This report shall document by program or service category those expenditures from the most recently completed fiscal year used to pay for services provided in prior fiscal years.

(g) In addition, each annual report required to be submitted by the Department of Public Aid under subsection (e) shall include the following information with respect to the State’s Medicaid program:

(h) As provided in Section 4 of the General Assembly Compensation Act, any utility bill for service provided to a General Assembly member's district office for a period including portions of 2 consecutive fiscal years may be paid from funds appropriated for such expenditure in either fiscal year.

(i) An agency which administers a fund classified by the Comptroller as an internal service fund may issue rules for:

1. billing user agencies in advance based on estimated charges for goods or services;
2. issuing credits during the subsequent fiscal year for all user agency payments received during the prior fiscal year which were in excess of the final amounts owed by the user agency for that period; and
3. issuing catch-up billings to user agencies during the subsequent fiscal year for amounts remaining due when payments received from the user agency during the prior fiscal year were less than the total amount owed for that period.

User agencies are authorized to reimburse internal service funds for catch-up billings by vouchers drawn against their respective appropriations for the fiscal year in which the catch-up billing was issued.

ANTI-CANCER DRUGS
(Senate Joint Resolution No. 57)

WHEREAS, Cancer is a leading cause of morbidity and mortality in the State of Illinois and throughout the Nation; and

WHEREAS, Cancer is disproportionately a disease of the elderly, with more than half of all cancer diagnoses occurring in persons age 65 or older, who are thus dependent on the federal Medicare program for provision of cancer care; and

WHEREAS, Treatment with anti-cancer drugs is the cornerstone of modern cancer care; elderly cancer patients must have access to potentially life-extending drug therapy, but the Medicare program’s coverage of drugs is limited to injectable drugs or oral drugs that have an injectable version; and

WHEREAS, The Nation’s investment in biomedical research has begun to bear fruit with a compelling array of new oral anti-cancer drugs that are less toxic, more effective and more cost-effective than existing therapies, but, because such drugs do not have an injectable equivalent, they are not covered by Medicare; and

WHEREAS, Non-coverage of these important new products leaves many Medicare beneficiaries confronting the choice of either substantial out-of-pocket personal costs or selection of more toxic, less effective treatments that are covered by the program; and

WHEREAS, Medicare’s failure to cover oral anti-cancer drugs leaves at risk many beneficiaries suffering from blood-related cancers like leukemia, lymphoma, and myeloma, as well as cancers of the breast, lung, and prostate; and

WHEREAS, Certain Members of the United States Congress have recognized the necessity of Medicare coverage for all oral anti-cancer drugs and introduced legislation in the 107th Congress to achieve that result (H.R. 1624: S. 913); therefore, be it

RESOLVED, BY THE SENATE OF THE NINETY-SECOND GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, THE HOUSE OF REPRESENTATIVES CONCURRING HEREIN, that we respectfully urge the Congress of the United States to adopt legislation requiring the Medicare program to cover all oral anti-cancer drugs; and be it further

RESOLVED, That copies of this resolution be transmitted to the President of the United States, Members of the United States Congress, the Secretary of Health and Human Services, and the Administrator of the Centers for Medicare and Medicaid Services.

Adopted by the Senate, April 18, 2002.

EXECUTIVE ORDER CREATING
THE ILLINOIS AGENDA FOR EXCELLENCE IN EDUCATION

WHEREAS, in 1998 the top priority of this administration was established as “excellence in education” for all Illinoisans of all ages who need training to keep pace in the skills required in the 21st Century economy, and

WHEREAS, the top budget priority for this administration was established as “education and workforce training,” with a four-year pledge to earmark at least 51 percent of all new general revenue to these areas, and

WHEREAS, since January of 1999, this administration, on behalf of the people of the State of Illinois, has fulfilled its commitment to these top priorities and made significant strides in improving education and workforce development at all levels, including:

• More than $1.4 billion in new funding for education
• The construction of 12,000 new classrooms
• The hiring of 10,423 new teachers, strengthened efforts to recruit, train and retain good teachers
• A renewed emphasis on high standards for students and regular testing to measure success against those standards
• An expansion of reading instruction, particularly in the lower primary grades
• The promotion of parental involvement
• An increase in educational “choice” for families
• A strong investment in classroom technology
• The creation of three career academies for high school students to facilitate advanced education in economics and finance, international studies and public policy
• Improved leadership in education and policy coordination under the auspices of a Deputy Governor for Education and Workforce Training and a Joint Education Committee composed of the Governor’s Office, the Illinois State Board of Education, the Illinois Board of Higher Education, the Illinois Community College Board and the Workforce Investment Board, and

WHEREAS, Illinois’ system of higher education is rated as the best in the nation by the National Center for Public Policy and Higher Education and

WHEREAS, Illinois received an “A” in Education Week’s “Quality Counts 2002” survey in recognition of the learning standards and accountability procedures that have been put in place since 1999, and since 1999, on average more than 60 percent of Illinois students tested have met or exceeded Illinois learning standards, and

WHEREAS, Illinois students and schools are headed in the right direction toward educational excellence, and it is imperative that the progress in educational excellence made over the last three years by the students of Illinois be maintained and strengthened,
and

WHEREAS, the progress of Illinois students in educational excellence would be enhanced in the years to come by maintaining sufficient resources and a strong commitment to the aforementioned policies established since 1999, and

WHEREAS, the progress of Illinois students would be further enhanced by also focusing sufficient resources and a strong commitment on:

1. Stringent learning standards and accountability procedures for students, teachers and schools.
   • In January of 2002, President George W. Bush and the Congress of the United States enacted a landmark reform of the federal government’s programs affecting elementary and secondary education in Illinois and all other states known as the “No Child Left Behind Act.”
   • The “No Child Left Behind Act” requires Illinois and all states to, among other things, initiate, by the 2005-2006 school year, the annual testing of elementary students in grades three, four, five six seven and eight in reading and mathematics.
   • The act requires Illinois schools to show, through the use of annual tests, steady progress in student achievement, based on foundation information collected in the 2001-2002 school year.
   • The act requires Illinois to establish, starting in the 2002-2003 school year, greater educational choice options for the parents of students in chronically-failing public schools, including upon-request transfers to other public or charter schools and upon-request supplemental services from public or private sources that would be paid for by the federal government.

2. Providing a universal access to early childhood education.
   • Scientific studies provide strong evidence that quality early education plays a critical role in the healthy development of children, including the positive stimulation of the brain during the early years that creates the foundation for lifelong thinking, attitudes and behavior, as well as greater success in school and work.
   • Studies estimate that every $1 invested in quality preschool results in benefits of $7.16 for taxpayers. If these benefits are applied to Illinois and if 60 percent of four-year-olds and 50 percent of three-year-olds participate, the estimated savings to taxpayers would total $3.3 billion during the lifetimes of these children.
   • Illinois is among the leaders nationally in early education programs. Since 1999 Illinois has expanded state government support for Prekindergarten, Head Start and child care programs by 53 percent to more than $533 million in Fiscal Year 2001. Nonetheless, only 36 percent of the total age group population are being served.
   • Surveys and community forums consistently show that many parents in Illinois cannot access or afford quality preschool programs in their communities, and a lack of cooperation and existing regulatory barriers result in service gaps and the inefficient use of tax dollars, making it difficult for providers to maintain stable, quality programs.
The enhanced recruitment, training, retention and professional development of teachers and administrators.

Between 1999 and 2001, the number of public and private school teachers in Illinois has increased by 10,423.

Nonetheless, during the next four years, Illinois’ 4,200 schools will have to hire approximately 55,000 new teachers and 3,500 new administrators to meet the classroom needs of more than 2 million students in kindergarten through high school.

The full implementation of universal preschool will require the addition of 5,000 certified early childhood teachers and the need to develop a coherent system for recruitment, training and retention.

There were 12,600 teaching openings in Illinois during the 2001-2002 school year and approximately 1,600 teaching jobs went unfilled. Of the 13,000 people certified to teach in Illinois in 2000, only 6,600 accepted jobs in teaching.

The most acute need for teaching is found in school districts that are culturally and economically diverse in cities and rural areas. More than 70 percent of elementary school teachers, 52 percent of middle school teachers and 34 percent of high school teachers do not have college majors in the subjects they are teaching. Only 25 percent of English teachers and 33 percent of math teachers majored or minored in those subjects.

The rate of attrition among Illinois teachers is 7.3 percent per year.

THEREFORE, I, George H. Ryan, Governor of the State of Illinois, order:

The establishment of the Illinois Agenda for Excellence In Education to promote, encourage and foster long-term improvement in elementary and secondary schools that will lead to consistently high student achievement, exemplary instruction and the well-rounded preparation of future generations.

The components of the Illinois Agenda for Excellence in Education shall be:

1. Creation of “Illinois Preschool” - a program that shall give all Illinois families a choice of quality preschool options for children age three and four.

A. Illinois Preschool shall coordinate, improve and expand existing programs so that every community can offer high-quality preschool in a variety of settings that include, but are not limited to, child care centers, family child care homes, schools, Head Start programs and community centers.

B. An “Illinois Preschool Council” will develop the implementation framework for universal access to quality preschool that shall be submitted for approval by the Governor and General Assembly by January 1, 2003. The Council shall:
   • Assess all needs and resources for early childhood education in Illinois.
   • Determine what supports are currently available for each type of program, and where gaps in services exist.
   • Develop recommendations to maximize opportunities to blend funding and partnerships across programs to meet program goals.
• Develop a multi-year state strategic plan for early childhood education and specify action steps to be taken.

• Encourage local collaboration and flexibility among early childhood education programs, and shall establish quality standards in key areas, such as teacher qualifications, curriculum and parent involvement.

The implementation plan, if funded by the General Assembly, shall begin in Fiscal Year 2004.

2. The T.E.A.C.H. and Great START programs shall be expanded through a cooperative effort of the Joint Education Committee to work with the General Assembly for increased funding commitments beginning with FY 2003.

3. The State Board of Education, in accordance with the federal “No Child Left Behind Act” shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy for annual student testing in grades three, four, five, six, seven, eight, nine, ten and eleven that expands upon existing state testing programs. The testing plan shall be fully operational for the 2005-2006 school year.

4. The State Board of Education shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy to bring the State of Illinois into compliance with the National Assessment of Educational Progress program, as required of all states in the “No Child Left Behind Act.”

5. The State Board of Education shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy to set stringent accountability standards for all elementary and secondary schools that include closing achievement gaps between disadvantaged students and other student groups, as well as a multifaceted intervention program for schools that do not meet these standards.

6. The Joint Education Committee shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy for a statewide system of mentoring and induction for all new teachers and administrators that will be initiated in stages over the next five school years, starting with the schools and school districts in Illinois with the most severe teacher retention problems.

7. The Joint Education Committee shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy to reconfigure the State’s current DeBolt Scholarship Program into a new incentive program named the Illinois Teacher Education Assistance Campaign, The ITEACH program shall provide scholarships of up to $5,000 each year for students studying to become teachers in subject areas that have been designated by the ISBE as an area where there is a shortage of teachers.

8. The Joint Education Committee shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy
that increases accountability for all providers of professional development services for teachers and administrators. All standards in this accountability system shall be based on reliable data concerning program effectiveness and the content knowledge needs of teachers.

9. The Joint Education Committee shall develop and submit to the Governor and General Assembly by January 1, 2003 a detailed plan and implementation strategy that brings administrator certificate renewal in Illinois into line with standards as recognized by the ISBE, the IBHE and the ICCB.

10. The Illinois State Board of Education, the Illinois Board of Higher Education, the Illinois Community College Board the Illinois Student Assistance Commission, the Illinois Workforce Investment Board and all other associated agencies, boards and commissions dealing with education and workforce training within state government shall maintain a strong commitment and sufficient resources to the aforementioned education and workforce policies established by this administration since 1999.

This Executive Order shall be effective immediately.

Issued by the Governor February 26, 2002.
