WHEREAS, in 1994, Congress initiated the King Day of Service, a nationwide effort to transform the federal holiday honoring Dr. Martin Luther King, Jr. into a day of community service, grounded in Dr. King’s teachings, that helps solve social problems; and,

WHEREAS, this day focuses on bringing people together and breaking down the barriers that have divided us as a nation; and,

CONGENITAL DIAPHRAGMATIC HERNIA AWARENESS DAY

WHEREAS, a congenital diaphragmatic hernia is an opening in the diaphragm that allows the abdominal organs to push into the chest cavity. This birth defect is often life-threatening because it limits the growth of the lungs; and,

WHEREAS, congenital diaphragmatic hernias occur in 1 of every 2,500 live births in the United States, affecting a total of 1600 babies nationwide with an average of 70 born in Illinois each year; and,

WHEREAS, with a 50% survival rate, 800 of the 1600 babies born every year with Congenital Diaphragmatic Hernia will die; and,

WHEREAS, since 2000, it is estimated that over 250,000 babies born with CDH have died; and,
WHEREAS, those with CDH often endure multiple surgeries and possible medical complications beyond their diagnosis that include heart defects, pulmonary complications, gastric and intestinal problems, developmental delays, and may require respiratory and medicinal support for years; and,

WHEREAS, early diagnosis and appropriate management of fetuses with congenital diaphragmatic hemias can minimize the incidence of emergency situations and dramatically improve survival rates. However, there is a need for increased public awareness of the condition; and,

WHEREAS, many organizations are working to promote public awareness and encourage research efforts to one day prevent or successfully treat all those diagnosed with congenital diaphragmatic hernias; and,

WHEREAS, on April 19, families and friends whose lives have been affected by CDH will have an opportunity to celebrate life and remember the loved ones they have lost to congenital diaphragmatic hernias, and to honor dedicated health professionals; and,

THEREFORE, I, Pat Quinn, Governor of the State of Illinois, do hereby proclaim April 19, 2013 as CONGENITAL DIAPHRAGMATIC HERNIA AWARENESS DAY in Illinois, in order to raise public awareness of this condition, and to encourage all citizens to learn more about congenital diaphragmatic hernias and support those who are affected.

WHEREAS, colorectal cancer, cancer of the colon or rectum, is the third leading cause of cancer-related deaths in the United States for both men and women combined; and,

WHEREAS, the lifetime risk of being diagnosed with cancer of the colon or rectum is 5.5 percent for men and 5.1 percent for women in the United States; and,

WHEREAS, every 3 minutes, someone is diagnosed with colorectal cancer and every 10 minutes someone dies from colorectal cancer; and,

WHEREAS, most cases of colorectal cancer begin as non-cancerous polyps, which are grape-like growths on the lining of the colon and rectum. These polyps can become cancerous. Consequently, their removal can prevent colorectal cancer from ever developing; and,

Unfortunately, less than 50 percent of Americans over the age of 50 receive regular screenings for colorectal cancer; and,

WHEREAS, a number of organizations throughout the country will sponsor activities and events this March that educate the public about the importance of getting screened regularly, as well as other ways to reduce the risk of colorectal cancer, such as adopting a healthy lifestyle and diet; and,

CPR AND AED AWARENESS WEEK

WHEREAS, heart disease affects men, women, and children of every age and race in the United States and it continues to be the leading cause of death in the United States; and,

WHEREAS, approximately 295,000 emergency medical services treated out-of-hospital that are cardiac arrests occur annually nationwide. Roughly 88 percent of sudden cardiac arrest victims die before arriving at the hospital. Sudden cardiac arrest results from an abnormal heart rhythm in most adults, often ventricular fibrillation. Unfortunately, only 32 percent of out-of-hospital cardiac arrest victims receive bystander cardiopulmonary resuscitation (CPR); and,

WHEREAS, prompt delivery of CPR more than doubles the victim’s chance of survival by helping to maintain vital blood flow to the heart and brain, increasing the amount of time in which an electric shock from a defibrillator can be effective; and,

WHEREAS, for every minute without bystander CPR, survival from witnessed cardiac arrest decreases 7-10 percent. The interval between the 911 telephone call and the arrival of Emergency Medical Services personnel is usually longer than five minutes, therefore a cardiac arrest victim’s survival is likely to depend on a public trained in CPR and AED use and access to these lifesaving devices; and,
