

RAVE

NOTIFICATION SYSTEM

What is the Rave Notification system?

Rave Notification system is a web-based notification service that can alert you to potential hazards that are located within and around the Capitol Complex, as well as buildings that are within the scope of responsibility of the Capitol Police.

How will the Secretary of the State Capitol Police utilize Rave?

When there is an active situation located in a building under control of the Capitol Police, CAPCOM can alert you by sending you a short text message to your cellphone, email or phone call depending on the type of alert.

How do you register to receive notifications from the Capitol Police Rave Alert System?

To register for an account with the Capitol Police Rave alert, please visit www.getrave.com/login/ILSOSDOP. Select the green register button located on the top right of the screen, then complete the fields and accept the terms and conditions of Rave. You will receive a four-digit code on your registered phone number that will confirm the registration process. Once you have registered, you will be required to log in to your account and select the tab for "opt-in lists." Currently, there is only one list available called the Capitol Notification System.
